

1. Record Nr.	UNINA9910461938103321
Autore	Khopkar Shripad Moreshwar
Titolo	Basic concepts of analytical chemistry [[electronic resource] /] / S. M. Khopkar
Pubbl/distr/stampa	Tunbridge Wells, : New Academic Science, c2012
ISBN	1-906574-37-5
Edizione	[3rd ed.]
Descrizione fisica	1 online resource (633 p.)
Soggetti	Chemistry, Analytic Statistics Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	<p>""Cover""; ""Preface to the Third Edition""; ""Preface to the First Edition""; ""Contents""; ""Chapter 1. Introduction""; ""1.1 Importance of Analytical Chemistry""; ""1.2 Methods of Quantitative Analysis""; ""1.3 Criteria for Selection of Method for Analysis""; ""1.4 Chemical Analysis and Analytical Chemistry ""; ""1.5 Quantitative Analysis with Scale of Operation ""; ""1.6 Steps in Quantitative Analysis ""; ""1.7 Methods of Analytical Determination ""; ""1.8 Role of Instrumentation ""; ""Literature""; ""Chapter 2. Reliability of Analytical Data and Statistical Analysis""</p> <p>""2.1 Errors in Chemical Analysis """"2.2 Classification of Errors ""; ""2.3 Determining the Accuracy of Methods ""; ""2.4 Improving the Accuracy of Analysis ""; ""2.5 Statistical Analysis ""; ""2.6 Criteria for Rejection of Results: Q-Test ""; ""2.7 Presentation of Data""; ""2.8 Confidence Limit ""; ""2.9 Q-Test for Rejection of Result ""; ""2.10 Standard 't' Test ""; ""Solved Problems""; ""Problems For Practice""; ""Literature""; ""Chapter 3. Sampling in Analysis""; ""3.1 Introduction ""; ""3.2 Definitions of Terms ""; ""3.3 Theory of Sampling ""; ""3.4 Techniques of Sampling "" ""3.5 Statistical Criteria of Ideal Sample """"3.6 Stratified Sampling Versus Random Sampling ""; ""3.7 Minimisation of Variance in Stratified Sampling ""; ""3.8 Transmission and Storage of Samples ""; ""Solved Problems ""; ""Problems For Practice""; ""Literature ""; ""Chapter 4. Gravimetric Analysis""; ""4.1 Precipitation Methods""; ""4.2 Purity of</p>

Precipitation : Coprecipitation "; "4.3 Optimum Conditions for
 Precipitation "; "4.4 Precipitation from Homogeneous Solution "; "4.5
 Washing of the Precipitate"; "4.6 Ignition of the Precipitate "
 "4.7 Role of Organic Precipitants in Gravimetric Analysis ""4.8 Criteria
 for Choice of an Organic Reagent "; "4.9 Some Important Organic
 Precipitants "; "4.10 Electrogravimetry "; "Solved Problems";
 "Problems For Practice"; "Literature"; "Chapter 5. Volumetric
 Analysisa€? Acid-Base Titrations"; "5.1 Volumetric Analysis "; "5.2
 Classification of Volumetric Methods "; "5.3 Acid-Base Titrations ";
 "5.4 Acid-Base Titration Curves "; "5.5 Acid-Base Indicators "; "5.6
 Mixed Indicators "; "5.7 Fluorescent Indicators "; "Solved Problems";
 "Problems For Practice"
 "Literature""Chapter 6. Redox Titrations"; "6.1 Theory of Redox
 Titration Curves "; "6.2 Some Oxidising Agents as Titrants "; "6.3
 Application of Iodine as Redox Reagent "; "6.4 Redox Indicators ";
 "6.5 Detection of End Point in Redox Titrations "; "Solved Problems";
 "Problems For Practice"; "Literature"; "Chapter 7. Precipitation
 Titrations"; "7.1 Theory of Precipitation Titration Curves "; "7.2
 Factors Influencing Solubility of the Precipitate"; "7.3 Titrations by
 Turbidity without an Indicator "; "7.4 Volhard's Method "; "7.5
 Mohr's Method "
 "7.6 Adsorption Indicators in Precipitation Titrations "
