Part II: Critical terms, A-Z; Bibliography; Index

**Sommario/riassunto**

This fully revised third edition of The Routledge Companion to Postmodernism provides the ideal introduction to postmodernist thought. Featuring contributions from a cast of international scholars, the Companion contains 19 detailed essays on major themes and topics along with an A-Z of key terms and concepts. As well as revised essays on philosophy, politics, literature, and more, the first section now contains brand new essays on critical theory, business, gender and the performing arts. The concepts section, too, has been enhanced with new topics ranging from hypermedia t

**Sommario/riassunto**

The Biographical Encyclopedia of Astronomers is a unique and valuable resource for historians and astronomers alike. The two volumes include approximately 1550 biographical sketches on astronomers from antiquity to modern times. It is the collective work of about 400 authors edited by an editorial board of 9 historians and astronomers, and provides additional details on the nature of an entry and some

summary statistics on the content of entries. This new reference provides biographical information on astronomers and cosmologists by utilizing contemporary historical scholarship. Individual entries vary from 100 to 1500 words, including the likes of the superluminaries such as Newton and Einstein, as well as lesser-known astronomers like Galileo's acolyte, Mario Guiducci. A comprehensive contributor index helps researchers to identify the authors of important scientific topics and treatises.
