Government Oversight of ComparativeEffectiveness: Lessons from Western Europe -Helen Evans; About the Contributing Authors; About the Hoover Institution's WorkingGroup on Health Care Policy; Index
	Sommario/riassunto	Health policy experts from the United States, Canada, and Western Europe discuss both what to expect from the recent health reform legislation and alternatives that should still be considered. The contributors argue that Americans already have a superior health care system and that if Congress enacts reforms that remove artificial barriers and constructively open markets to competition, private-sector

creativity will generate innovative, low-cost insurance products for tens of millions of consumers.
