4.1 Decomposition of Gender Earnings Gap in Latin America and the Caribbean, by Country, Circa 2007 after Controlling for Demographic and Job Characteristics

Sommario/riassunto

After a sustained economic growth period at the end of the last century and the beginning of this one, Latin America still faces high inequality and lower well-being indicators among women, afro-descendants, and indigenous peoples. This is a period in which the world and particularly Latin America has experienced important changes regarding the role of women and men. Marriage, education and work decisions have evolved and, as a result, women's visibility at home, at school, in the labor markets and in society have evolved as well. But there are still, however, important challenges in the labor
