Sommario/riassunto

Select and execute the best trades-and reduce risk Rather than teaching options from a financial perspective, *How to Price and Trade Options: Identify, Analyze, and Execute the Best Trade Probabilities* goes back to the Nobel Prize-winning Black-Scholes model. Written by well-known options expert Al Sherbin, it looks at the basis for probability theory in option trading and explains how to put the odds in your favor when trading options. Inside, you'll discover how anyone can "operate their own casino" if they know how through proper option strategies. Plus, a supplemental website includes
