Sommario/riassunto

This thoroughly revised and updated second edition of *Methods for Community-Based Participatory Research for Health* provides a step-by-step approach to the application of participatory approaches to quantitative and qualitative data collection and data analysis. With contributions from a distinguished panel of experts, this important volume shows how researchers, practitioners, and community partners can work together to establish and maintain equitable partnerships using a Community-Based Participatory Research (CBPR) approach to increase knowledge and improve the health and well-being
