Sommario/riassunto	The IMF, with the Bank for International Settlements and the Financial

Stability Board, has been at the forefront of discussions on reform of the global financial system to reduce the possibility of future crises, as well as to limit the consequences if they do occur. The policy choices are both urgent and challenging, and are complicated by the relationship between sovereign debt and risks to the banking sector. Building a More Resilient Financial Sector describes the key elements of the reform agenda, including tighter regulation and more effective supervision; greater transparency to streng
