Sommario/riassunto

This new volume reviews the latest research on fathering from every continent, from cultures representing over 50% of the world's population. International experts on 14 societies/regions discuss cultural and historical influences, variations between and within cultures, and socio economic conditions and policies that impact fathering. Contributors from several disciplines provide thought-provoking reviews of the empirical data to help us gain an understanding of fathering worldwide. Over 1,000 studies on fathering published in languages other than English are made accessible to readers aro
