Sommario/riassunto	Becoming An Anthropological Approach to Understandings of the Person in Java is an ethnographic monograph that examines the ways in which the peoples of a peri-urban locality in East Java, Indonesia conceive of the person, by looking at how their everyday practices relate to understandings of ethnicity, kinship, Islam and gender. The volume is also a thought experiment that aims to make a theoretical contribution to the discipline of anthropology by proposing the concept of the diaphoron person and re-deploying the method of total ethnography.
