Sommario/riassunto	The authors have researched the Salonika Campaign in every detail, from the arrival of the first British troops in 1915 to final victory. During this period large numbers of British and allied troops were tied up in the strategically vital Balkans. Salonika was converted into a vast military base and over 70 miles of defensive works were created. We learn of the disappointments of the British XII Corps offensive in April/May 1917 (The First Battle of Doiran) and the more successful aggressive raiding in the Struma Valley. Using first hand accounts a vivid picture of life for the British Army is

Sommario/riassunto

In a provocative assessment of American poverty and policy from 1950 to the present, Frank Stricker examines an era that has seen serious discussion about the causes of poverty and unemployment. Analyzing the War on Poverty, theories of the culture of poverty and the underclass, the effects of Reaganomics, and the 1996 welfare reform, Stricker demonstrates that most antipoverty approaches are futile without the presence (or creation) of good jobs. Stricker notes that since the 1970's, U.S. poverty levels have remained at or above 11%, despite training programs and periods of economic growth.
