#### Sommario/riassunto

This volume explores the various strategies, mechanisms and processes that influence rule of law dynamics across borders and the national/international divide, illuminating the diverse paths of influence. It shows to what extent, and how, rule of law dynamics have changed in recent years, especially at the transnational and international levels of government. To explore these interactive dynamics, the volume adopts an interdisciplinary approach, bringing together the normative perspective of law with the analytical perspective of social sciences. The volume contributes to several fields, including studies of rule of law, law and development, and good governance; democratization; globalization studies; neo-institutionalism and judicial studies; international law, transnational governance and the emerging literature on judicial reforms in authoritarian regimes; and comparative law (Islamic, African, Asian, Latin American legal systems).

Nota di contenuto	Preface -- Introduction -- The three-step procedure to design requests for an answer -- Concepts-by-postulation and concepts-by-intuition -- From social science concepts-by-intuition to assertions -- The formulation of requests for an answer -- Choices involved in questionnaire design -- Specific survey research features of requests for an answer -- Response alternatives -- The structure of open-ended and closed survey items -- Survey items in batteries -- Mode of data collection and other choices -- The effects of survey characteristics on data quality -- Criteria for the quality of survey measures -- Estimation of reliability, validity and method effects -- Split ballot mtmm designs -- Mtmm experiments and the quality of survey questions -- Applications in social science research -- The sqp 2.0 program for prediction of quality and the -- Improvement of measurement -- The quality of measures for concepts-by-postulation -- Correction for measurement errors -- Coping with measurement error in cross-cultural research -- References -- Index.
Sommario/riassunto	Design, Evaluation, and Analysis of Questionnaires for Survey Research,

Second Edition explores updates on the statistical knowledge and development of survey questionnaires, including analyzing the important decisions researchers make throughout the survey design process. The new edition provides coverage of an updated SQP program, which has an expanded question database from the Multi-trait Multi-method (MTMM) experiments. This book aims to give students and survey researchers a state-of-the-art introduction to questionnaire design and how to construct questionnaires with the highest
