Sommario/riassunto   Central America, Panama, and the Dominican Republic coped well with the global financial crisis of 2008-09. The impact was generally less severe and shorter lived than in previous episodes, the balance of payments adjustment was orderly, and the stability of the financial system was not compromised. This resilience can be attributed to a large extent to the strengthening of the fiscal frameworks, monetary management, and financial reforms conducted in the years preceding the global crisis. Nevertheless, the region faces considerable challenges for the period ahead, including the need to raise

Sommario/riassunto   In this paper we claim that the emergence of the existential pro-form in early Italo-Romance is motivated by the overt marking of definiteness on the pivot. The available data from a relatively large corpus of early Italo-Romance texts dating from C13th to C16th

suggest that the overt marking of definiteness, which differentiates Romance from its ancestor Latin, favours the establishment of an existential pattern where the encoding of non-canonical pivots (definite ones) is licensed only if a locative element occurs in the structure; this can be a locative phrase, a locative relative pronoun
