

1. Record Nr.	UNINA9910462483703321
Titolo	Occupational ergonomics : theory and applications / / edited by Amit Bhattacharya, James D. McGlothlin
Pubbl/distr/stampa	Boca Raton, Fla. : , : CRC Press, , 2011
ISBN	0-429-14496-2 1-280-12173-4 9786613525598 1-4398-1935-1
Edizione	[2nd ed.]
Descrizione fisica	1 online resource (1311 p.)
Altri autori (Persone)	BhattacharyaAmit <1946-> McGlothlinJames D
Disciplina	620.8/2
Soggetti	Human engineering Industrial hygiene Industrial safety Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	pt. 1. Principles of ergonomics -- pt. 2. Application of ergonomic principles -- pt. 3. Medical surveillance for ergonomics programs -- pt. 4. Ergonomic case studies -- pt. 5. Physical agents in workplace -- pt. 6. Current topics -- pt. 7. International perspective on ergonomics.
Sommario/riassunto	Preface Since the publication of the first edition in 1996, significant new advances have been made in the field of ergonomics. These advances include the impact of aging and obesity in the workplace, the role of ergonomics in promoting healthy workplaces and healthy lifestyles, the role of ergonomic science in the design of consumer products, and much more. Therefore, we saw a critical need to update the first edition, which has had more than a dozen printings and can be found in libraries all over the world. We hope you agree that the second edition fills a critical gap between existing ergonomic books by providing a comprehensive approach that encompasses the principles of ergonomics from theory to practice. It also blends medical and engineering applications to solve musculoskeletal, safety, and health

problems in a variety of traditional and emerging industries ranging from the office to the operating room to operations engineering. The scope and contents of this comprehensive book are such that it is suitable for graduate (and senior level undergraduate) students as well as a reference text for occupational safety and health professionals. This book is designed to address both the fundamentals of ergonomics (Part I) as well as practical applications (Part II) of those fundamentals in solving ergonomic problems to provide an insight into methods used to assess ergonomic risks and their control. Part III addresses the issue of connecting physical risk factors to the development of adverse health outcomes, thus providing a framework for the development of medical surveillance programs designed to monitor/control ergonomic-related challenges in the workplace--

2. Record Nr.	UNINA9910481826303321
Autore	Hamelmann Hermann <1525-1595.>
Titolo	Concio de latronibus una cum Christo crucifixis, qua unius securitas, & alterius vera poenitentia, fidesq[ue] adeò mirifica describitur, ut apostolorum et prophetarum fidem superare videatur adiectis ex pia vetusta patrum testimoniis, quod non aliter salventur homines, quàm latro dexter est salvatus autore Hermanno Hamelmanno [[electronic resource]]
Pubbl/distr/stampa	Rostock, : [s.n.], 1569
Descrizione fisica	Online resource ([25] bl. [af oprindelig 28])
Lingua di pubblicazione	Latino
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Reproduction of original in Det Kongelige Bibliotek / The Royal Library (Copenhagen).
