Sommario/riassunto	Advances in Combinatorial Chemistry & High Throughput Screening, is an e-book series comprising updated research articles previously published in the impact factor journal, Combinatorial Chemistry & High Throughput Screening (CCHTS). A wide range of topics are covered by these articles including chemical biology, high throughput screening, combinatorial chemistry, chemoinformatics, laboratory automation and compound management. This series is, therefore, a testament to CCHTS contributions in advancing drug discovery on full throttle. This eBook series opens up a new avenue for rapid access for
