Sommario/riassunto

Great strides have been made in the field of natural medicine with respect to neurocognition. Once limited to the province of niche publications, these discoveries are now routinely explored in mainstream psychopharmacology, neuroscience, nutrition, and medical journals. Now presented in one convenient volume, *Advances in Natural Medicines, Nutraceuticals and Neurocognition* reflects the breadth and depth of recent advances in this area. The editors of this volume are affiliated with one of the leading research centers in this area. Bringing together the work of contributors from around the globe
