

1. Record Nr.	UNINA9910462588803321
Titolo	Developments in fiber-reinforced polymer (FRP) composites for civil engineering // edited by Nasim Uddin
Pubbl/distr/stampa	Cambridge, UK : , : Woodhead Publishing Limited, , 2013
ISBN	0-85709-895-0
Edizione	[1st edition]
Descrizione fisica	1 online resource (565 p.)
Collana	Woodhead Publishing series in civil and structural engineering, , 2052-4714 ; ; number 45
Altri autori (Persone)	UddinNasim
Disciplina	620.1 620.1/18
Soggetti	Fiber-reinforced plastics Fiber-reinforced concrete Fibrous composites Reinforced concrete construction Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	part I. General developments -- part II. Particular types and applications.
Sommario/riassunto	The use of fiber-reinforced polymer (FRP) composite materials has had a dramatic impact on civil engineering techniques over the past three decades. FRPs are an ideal material for structural applications where high strength-to-weight and stiffness-to-weight ratios are required. Developments in fiber-reinforced polymer (FRP) composites for civil engineering outlines the latest developments in fiber-reinforced polymer (FRP) composites and their applications in civil engineering. Part one outlines the general developments of fiber-reinforced polymer (FRP) use, reviewing recent advancements
