Note generali	Paulo Cesar Sandler, MD, MSc, MhFAB, is a Training Analyst at the Sociedade Brasileira de Psicanalise de Sao Paulo, Psychiatrist at the Institute of Physical Medicine and Rehabilitation (IMREA) at the Hospital das Clinicas, Faculdade de Medicina da Universidade de Sao Paulo, and author of several books in Portuguese. He has written many papers and book chapters, some of which have been published in English and French. He has translated most of Bion's books and papers into Portuguese and has organized several international meetings on the work of Bion. Dr Sandler currently teaches in a post-graduate course at the University of Sao Paulo, and at the Institute of Psycho-Analysis of the SBPSP, giving courses about the work of Freud, Klein and Bion. He has worked in private psychoanalytic practice since 1974, having previously worked with psychotics in a traditional in-patient clinic, as well as in group-oriented community psychiatry, including epidemiology of mental disorders, in the local Public Health School.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	pt. I. The multi-dimension grid -- pt. II. Free associations and free-floating attention -- pt. III. Epistemology and truth -- pt. IV. Groups.

Sommario/riassunto

This book presents many correlations which link remarkable theories from Bion with a detailed selection of the author's personal clinical experiences. It demonstrates the real existence of conditions that allow dialogue and clinical investigation by the analytic pair.
