Sommario/riassunto

How does China project its image in the world? Why and how has the world come to form certain impressions of the Chinese and their way of life? These are issues that preoccupy Chinese citizens in the globalizing 21st century as they travel overseas, riding on the capacity of the country's newly acquired economic power. In Visualizing China, the authors join forces to launch a broader inquiry aimed at a synergistic understanding of the larger story of visibility in modern China. The essays cluster around several nodal points including photographs, advertising, posters and movies, spanning from the 1840's to the 1960's, and devote special attention to modern Chinese practices in the visualization of things Chinese.
