10 Investment strategies and technology options for sustainable agricultural development in Asia: Challenges in the emerging context  
11 Water management for food security and sustainable agriculture: Strategic lessons for developing economies; Index

Sommario/riassunto

This book addresses strategies for food security and sustainable agriculture in developing economies. The book focuses primarily on India, a fast developing economy, whose natural resource base comprising land and water supporting agricultural production is not only under enormous stress, but also complex and not amenable to a uniform strategy. It critically reviews issues which continue to dominate the debate on water management for agricultural and food production. The book examines the validity of the claim that large water resources projects cause serious social and environmental
