

1. Record Nr.	UNINA9910462764203321
Autore	Thomas Jerry Bruce <1941->
Titolo	An Appalachian reawakening [[electronic resource]] : West Virginia and the perils of the new machine age, 1945-1972 / / Jerry Bruce Thomas
Pubbl/distr/stampa	Morgantown, W. Va., : West Virginia University Press, 2010
ISBN	1-933202-59-9
Edizione	[1st ed.]
Descrizione fisica	x, 470 p. : ill
Collana	West Virginia and Appalachia ; ; v. 12
Disciplina	975.4/043
Soggetti	Social change - West Virginia - History - 20th century Electronic books. West Virginia History 20th century West Virginia Social conditions 20th century West Virginia Politics and government 20th century West Virginia Economic conditions 20th century
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references (p. 422-442) and index.

2. Record Nr.	UNINA9910404088503321
Autore	Adams William M
Titolo	Water Intake, Body Water Regulation and Health
Pubbl/distr/stampa	MDPI - Multidisciplinary Digital Publishing Institute, 2020
ISBN	3-03928-657-9
Descrizione fisica	1 online resource (184 p.)
Soggetti	Biology, life sciences
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>The purpose of this Special Issue, "Water Intake, Body Water Regulation, and Health", is to present novel reviews and experimental data regarding hydration physiology and its implication in overall health. Water has previously been dubbed the forgotten nutrient due to humans' and animals' ability to subsist seemingly unchanged across a wide range of daily water intakes. However, with the introduction of stressors such as exercise, diseased states, and/or chronic high or low water intake, the homeostatic signals related to body water regulation can influence organ and whole-body health. This Special Issue will discuss water intake, the scientific rationale surrounding the U.S. and European water intake guidelines, homeostatic mechanisms, diseases related to dysfunction of water regulation, and differences in the volume and the vehicle in which the water is contained (i.e., plain water versus mixed beverages) on water intake during and following exercise. The aim is to continue discussion surrounding water, the previously forgotten nutrient, and highlight the importance of water in daily life.</p>
