Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Unpicking the global knowledge economy and education -- England : social problems and special needs -- England : endless vocational initiatives -- England : working with the lower attainers -- USA : divergence by race -- Germany : transition to where? -- Malta : colonial and religious legacies -- Finland : a model for us all? -- Conclusions : low attainers, low skill work and flexicurity.
Sommario/riassunto	What happens to young people who are defined as lower attainers or having learning difficulties in a global knowledge economy? How do we stop those with learning difficulties or disabilities being seen as social problems or simply as consumers of resources? Governments in developed countries are driven by the belief that in a global economy all citizens should be economically productive, yet they are still not clear about the relationship between the education of low attainers and the labour market. Ignorant Yobs?: Low Attainers in a Global Knowledge Economy examines this international phe

gate-- and perverts within : managing internal and external threats to community online / Steve Abrams and Smaragd Grun -- Brotherhood of blood : Aryan tribalism and skinhead cybercrews / Jody M. Roy -- Radical tribes at Warre : primitivists on the net / Mathieu O'Neil -- "Tribe" migrates crime to cyberspace : Nigerian Igbos in 419 e-mail scams / Farooq A. Kperogi and Sandra Duhe.

### Sommario/riassunto

Whether people want to play games and download music, engage in social networking and professional collaboration, or view pornography and incite terror, the Internet provides myriad opportunities for people who share common interests to find each other. The contributors to this book argue that these self-selected online groups are best understood as tribes, with many of the same ramifications, both positive and negative, that tribalism has in the non-cyber world. In *Electronic Tribes*, the authors of sixteen competitively selected essays provide an up-to-the-minute look at the social uses and occasional abuses of online communication in the new media era. They explore many current Internet subcultures, including MySpace.com, craftster.org, massively multiplayer online role-playing games (MMORPGs) such as World of Warcraft, music downloading, white supremacist and other counterculture groups, and Nigerian e-mail scams. Their research raises compelling questions and some remarkable answers about the real-life social consequences of participating in electronic tribes. Collectively, the contributors to this book capture a profound shift in the way people connect, as communities formed by geographical proximity are giving way to communities—both online and offline—formed around ideas.
