Sommario/riassunto

Interpersonal Regulation of Learning and Motivation is the first book in the field to focus on major methodological advances in research on interpersonal regulation of learning and motivation. Interest in developing ways of capturing the dynamics of interpersonal regulation in real-life learning interactions is growing rapidly. Understanding these dynamics is particularly timely given the increased use of collaborative learning activities in schools and university settings, as well as through face-to-face and computer supported collaborative learning (CSCL) environments.
