Sommario/riassunto

This book provides unique insights into the challenges and potential solutions to alleviate poverty in western China. Many people are interested in China's economic and social development; the development of Tibet is an important part of this narrative. Unlike big cities in the east of China, Tibet is still underdeveloped, with severe poverty, relatively poor communications, poor infrastructure, transport links, and limited social services. Using deep and well-researched analyses, learned Chinese scholars share their policy insights, experience and knowledge of the underlying causes and potent
