Ashley Roach -- Arbitration innovations in recent U.S. investment treaties / Gary H. Sampliner.
Sommario/riassunto	Arbitration is a staple of international dispute resolution. Though the international community now has a plethora of courts and tribunals at its disposal, for numerous reasons international arbitration remains a central mechanism—perhaps even the central mechanism in third-party resolution of international commercial disputes. International Arbitration: Contemporary Issues and Innovations brings together some of the world's most distinguished experts to examine important contemporary issues and trends in international arbitration. The

volume offers a broad range of analysis beginning with current key procedural issues. Both Private and Public International Law are examined, including such topics as investor-state relations, arbitration in the law of the sea and human rights and investment arbitration.
