Sommario/riassunto	This book provides an empirical study of the increasing importance of the concept of the entrepreneur in the context of the neoliberal cultural paradigm. Using the theoretical framework of the post-structural discourse theory and methods of qualitative discourse analysis, the book describes the changes in political discourse that resulted in the increasing dominance of the figure of the entrepreneur after the late 1980s.

The present volume investigates the legacy of Gottlob Frege, Bertrand Russell and Ludwig Wittgenstein in contemporary philosophy of language and linguistics. These philosophers inspired both the development of analytic philosophy and various philosophical approaches to the study of language. They have influenced technical discussions on truth, proper names, definite descriptions, propositions and predication, sense and reference, truth, and philosophical and linguistic inquiries into the relations between language, mind and the world. The studies gathered in this volume discuss most of these issues and aim to show that the results of this research are still of utmost importance, and that the three philosophers have significantly contributed to the linguistic turn in philosophy and the philosophical turn in the study of language. The volume includes contributions by: Joachim Adler (Zurich), Maria Cerezo (Murcia), Pawel Grabarczyk (Lodz), Arkadiusz Gutt (Lublin), Tom Hughes (Durham), Gabriele Mras (Vienna), Carl Humphries (Cracow), Gary Kemp (Glasgow), Siu-Fan Lee (Hong Kong), Jaroslav Peregrin (Prague), Ulrich Reichard (Durham), Piotr Stalmaszczyk (Lodz), Piotr Szalek (Lublin), Mieszko Talasiewicz (Warsaw).
