

1. Record Nr.	UNINA9910462841003321
Titolo	Diffusion in semiconductors, other than silicon : compilation / / editor: D. J. Fisher
Pubbl/distr/stampa	Zurich ; ; Enfield, New Hampshire : , : Trans Tech Publications, , [2010] ©2010
ISBN	3-03813-379-5
Descrizione fisica	1 online resource (152 p.)
Collana	Defect and diffusion form ; ; 308
Altri autori (Persone)	FisherD. J
Disciplina	537.6225
Soggetti	Semiconductors - Diffusion Chemical elements Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	Diffusion in Semiconductors, Other than Silicon: Compilation; Table of Contents; Abstracts
Sommario/riassunto	Review from Book News Inc.: Summary reports of 337 experiments provide information on the diffusion of matter and heat in 31 materials used in semiconductors. Most of the compounds are based on cadmium, gallium, indium, lead, and zinc. Mercury telluride is included however, as is silicon carbide for some reason. Each article is thoroughly referenced to the authors and publication number, date, and page. The arrangement is alphabetical by semiconductor material. Indexes cover authors, hosts, and diffusants.
