Sommario/riassunto	The first volume in the new Cambridge Handbooks in Behavioral Genetics series, Behavioral Genetics of the Mouse provides baseline information on normal behaviors, essential in both the design of experiments using genetically modified or pharmacologically treated animals and in the interpretation and analyses of the results obtained. The book offers a comprehensive overview of the genetics of naturally occurring variation in mouse behavior, from perception and spontaneous behaviors such as exploration, aggression, social interactions and motor behaviors, to reinforced behaviors such as the different types of learning. Also included are numerous examples of

potential experimental problems, which will aid and guide researchers trying to troubleshoot their own studies. A lasting reference, the thorough and comprehensive reviews offer an easy entrance into the extensive literature in this field, and will prove invaluable to students and specialists alike.

Sommario/riassunto	The "Greek Crisis" in Europe: Race, Class and Politics, critically analyses the publicity of the Greek debt crisis, by studying Greek, Danish and

German mainstream media during the crisis' early years (2009-2015). Mass media everywhere reproduced a sensualistic "Greek crisis" spectacle, while iterating neoliberal and occidentalist ideological myths. Overall, the Greek people were deemed guilty of a systemic crisis, supposedly enjoying lavish lifestyles on the EU's expense. Using concrete examples, the study foregrounds neoorientalist, neoracist and classist stereotypes deployed in the construction and media coverage of the Greek crisis. These media practices are connected to the "soft politics" of the crisis, which produce public consensus over neoliberal reforms such as austerity and privatizations, and secure debt repayment from democratic interventions.
