

1. Record Nr.	UNINA9910463017603321
Titolo	Surface and interfacial aspects of cell adhesion // edited by A. Carre and K.L. Mittal
Pubbl/distr/stampa	Leiden : , : Boston : , : VSP Boca, Raton, Fla. : , : CRC Press, , 2010, c2011
ISBN	0-429-08847-7 90-04-19080-5
Descrizione fisica	1 online resource (545 p.)
Altri autori (Persone)	CarreA (Alain) MittalK. L. <1945->
Disciplina	571.6
Soggetti	Cell adhesion molecules Cell adhesion Surface active agents Cellular control mechanisms Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	pt. 1. Fundamentals of cell adhesion -- pt. 2. Methods to study cell adhesion -- pt. 3. Surface treatments to control cell adhesion and behavior -- pt. 4. Cell adhesion in medicine and therapy.
Sommario/riassunto	Cell adhesion comes into play in almost all domains of life. The range of situations in which it occurs, involving organisms, living tissues, microorganisms or single cells, is endless. Cell adhesion is involved in the binding of a cell to a surface, extracellular matrix, or another cell using cell adhesion molecules. It is crucial in the formation and maintenance of coherent multicellular structures. Cell surface adhesion molecules (integrins, for example) which transmit information from the extracellular matrix to the cell play vital roles in numerous cellular processes. Some of these includ
