Sommario/riassunto	Hysteria Complicated by Ecstasy offers a rare window into the inner life of a person ordinarily inaccessible to historians: a semiliterate peasant girl who lived almost two centuries ago, in the aftermath of the French Revolution. Eighteen-year-old Nanette Leroux fell ill in 1822 with a variety of incapacitating nervous symptoms. Living near the spa at Aix-les-Bains, she became the charity patient of its medical director, Antoine Despine, who treated her with hydrotherapy and animal magnetism, as hypnosis was then called. Jan Goldstein translates, and provides a substantial introduction to, the previously unpublished manuscript recounting Nanette's strange illness--a manuscript coauthored by Despine and Alexandre Bertrand, the Paris physician who memorably diagnosed Nanette as suffering from "hysteria complicated by ecstasy." While hysteria would become a fashionable disease among urban women by the end of the nineteenth century, the case of Nanette Leroux differs sharply from this pattern in its early date and rural

setting. Filled with intimate details about Nanette's behavior and extensive "ations of her utterances, the case is noteworthy for the sexual references that contemporaries did not recognize as such; for its focus on the difference between biological and social time; and for Nanette's fascination with the commodities available in the region's nascent marketplace. Goldstein's introduction brilliantly situates the text in its multiple contexts, examines it from the standpoint of early nineteenth-century medicine, and uses the insights of Foucault and Freud to craft a twenty-first-century interpretation. A compelling, multilayered account of one young woman's mental afflictions, *Hysteria Complicated by Ecstasy* is an extraordinary addition to the cultural and social history of psychiatry and medicine.

Sommario/riassunto	"Taking Your Library Career to the Next Level: Participating, Publishing, and Presenting helps librarians establish a brand and name recognition in their area of expertise, suggesting how to write winning proposals for both publication and presentation and places to publish. In

addition, it covers how to conquer fears of public speaking and how to make presentations more dynamic. As professional development is important in most library settings to earn or maintain credentials, this book helps academic librarians look for opportunities to earn tenure, also helping special librarians look for ways to focus their training on a narrow subject area. Regardless of their reason for looking for professional development opportunities, librarians of all types will find satisfaction in contributing to the profession at a higher level. Participating in professional conversations and decision-making that impacts others in the field, and sharing knowledge through publishing and presenting are great ways to become better librarians. Helps librarians establish an area of specialty and generate name recognition in their sub-field ; provides guidance on the writing process and publishing opportunities, also touching on places to present material. Includes guidance on establishing a brand, writing successful proposals, and being a dynamic speaker" -- Provided by publisher.
