Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	pt. 1. The economization of climate change -- pt. 2. The securitization of climate change -- pt. 3. The technocratization of climate change -- pt. 4. Between de- and re-politicization.
Sommario/riassunto	Global climate change is perceived to be one of the biggest challenges for international politics in the 21st century. This work seeks to fuse a global governance perspective together with different interpretive approaches, offering a novel way of looking at international climate politics. Equipped with a common interpretive tool-kit, the authors examine different issue-areas and excavate the contours of an overall pattern - the depoliticisation of climate governance. It is this concept which represents the overarching theme connecting the different contributions, addressing issues such as
