Treatment guidelines & algorithm; 4. Steroids; 5. Immunoglobulins; 6. Immunosuppressants; 7. Thrombopoietin receptor agonists; 8. Platelet transfusion; 9. Surgical approach; Index
Sommario/riassunto	Immune thrombocytopenia (ITP) is the best characterized human autoimmune disease and affects approximately 5% of the world's population. Clinically, it is defined by a low platelet count and increased bleeding risk. In this book, international experts provide a rounded overview of the disease and its management.
