Sommario/riassunto	In December 1936, at the height of the Abdication Crisis, Cosmo Gordon Lang, Archbishop of Canterbury held the fate of the British monarchy in his hands. Together with the Prime Minister Stanley Baldwin, he helped to manoeuvre Edward VIII from the throne and to replace him with the king's brother, the Duke of York, who was to become George VI. It was a move which would have far-reaching consequences for the course of British history. The period 1928-1942 saw some of the greatest political and social upheavals in modern British history and Lang was at the centre of these. As Archbishop of Canterbury he had to deal with the challenges of the Great Depression, the Second World War, and the changing nature of the Church of England in the post-war era. This book provides a comprehensive overview of Lang's life and career, from his early days as a student at Cambridge to his final years as an elderly man in retirement. It also examines the impact of his ministry on the Church of England and the wider society of the time.
