Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. [325]-330) and index.
Nota di contenuto	Law as remedy -- The structural engineering of the Code : the gate to the concealed -- The social function of property law -- Contract law as ideology : the emergence of contractual justice -- The dominion of progress -- Toward a new modus vivendi : legal flexibility (Muruna) as a social interest -- The lesser evil.
Sommario/riassunto	Dr. 'Abd al-Razzq al-Sanhr (1895-1971) is one of the most prominent jurists to emerge to date in the Arab world. His alarm at the growing social gap in his country, Egypt, during the first half of the twentieth century, fueled his vision of establishing moral social order by means of a new civil code. Although Sanhr's chosen tool was the legal text, this book argues that his vision was essentially a social one: to introduce the principles of compassion, solidarity and fairness, alongside progress and pragmatism, into polarized Egyptian society, whereby property laws acquired a social function, the laws of partnership were perceived as having an educational value, and contract law was activated as a balance favoring the weaker members

of society. Accordingly, this book examines the drafting of the Egyptian Civil Code, exposing the hitherto unknown sociological strata of this act of legislation.

Sommario/riassunto	No fewer than 223 verses in Proverbs appear two times (79 sets), three times (15 sets), or even four times (5 sets) in identical or slightly altered form—more than 24% of the book. Heim analyzes all of these, presenting them in delineated Hebrew lines and in English translation. Where appropriate, the translations are followed by textual notes that

discuss uncertainties regarding the textual witnesses (textual criticism) and explore lexical, grammatical, and syntactical problems. Heim also analyzes the way the parallelism in each verse of a variant set has been constructed, presenting diagrams and tables with columns that highlight the corresponding similarities and differences among repeated verses. Key to this investigation is the search for links between the variants and their surrounding verses, such as repetitions of sound and sense. Heim shows that most variant repetitions result from skillful poetic creativity. Reconstruction of the editorial and creative poetic process highlights what poets did, how they did it, and why they did it. He develops criteria for determining the direction of borrowing between the verses and demonstrates that the phenomenon of variant repetition is an editorial concern that operates on the level of the book as a whole. He develops and refines a range of interpretive techniques and skills, arrives at fresh interpretations, and shows that ancient proverbial wisdom is relevant to modern societies. This study sheds new light on the nature of biblical poetry and on the methods and virtues best suited for its study. While specific to the book of Proverbs in the first instance, the findings in this study apply to poetry elsewhere. Three fundamental insights should inform future work on poetry: the creative combination of repetition with variation is the very essence of poetry; what has been written with imagination should be read with imagination; imaginative interpretation values the normal features of poetic expression and celebrates the truly unusual.

3. Record Nr.	UNINA9910270873903321
Titolo	Peripheral artery disease / / edited by Emile R. Mohler, Michael R. Jaff
Pubbl/distr/stampa	Hoboken, New Jersey ; ; Chichester, England : , : Wiley-Blackwell, , 2017 ©2017
