The Technological Basis of Organizational Membership: Representation of Interests in the New Media Age / Karpf, David --

Sommario/riassunto

In any democracy, the central problem of governance is how to inform, organize, and represent the opinions of the public in order to advance three goals: popular control over leaders, equality among citizens, and competent governance. In most political analyses, voting is emphasized as the central and essential process in achieving these goals. Yet democratic representation encompasses a great deal more than voter beliefs and behavior and, indeed, involves much more than the machinery of elections. Democracy requires government agencies that respond to voter decisions, a civil society in which powerful organized interests do not dominate all others, and communication systems that permit divergent voices to be heard. Representation: Elections and Beyond brings together leading international scholars from a wide range of disciplines to explore the twenty-first-century innovations-in voting laws and practices, in electoral systems, in administrative, political, and civil organizations, and in communication processes and new technologies-that are altering how we understand democratic representation. Featuring twelve essays that engage with national, provincial, and municipal governments across three continents, this volume tackles traditional core elements of democratic representation, such as voting, electoral systems, and political parties, while also underscoring the ways in which beliefs and preferences of citizens are influenced, expressed, and aggregated and the effects of those methods and practices on political agendas and policy outcomes. In pinpointing deficiencies in contemporary democratic practices and possibilities for reform, Representation provides an invaluable roadmap to improve democratic representation in the twenty-first century. Contributors: André Blais, Pradeep Chhibber, Archon Fung, Jacob Hacker, Zoltan Hajnal, Matthew Hindman, David Karpf, Georgia Kernell, Alexander Keyssar, Anthony McGann, Susan Ostermann, Paul Pierson, Dennis Thompson, Jessica Trounstein, Mark E. Warren.
