

1. Record Nr.	UNINA9910463278803321
Titolo	Handbook of laser welding technologies / / edited by Seiji Katayama
Pubbl/distr/stampa	Philadelphia, PA : , : Woodhead Pub., , 2013
ISBN	0-85709-877-2
Edizione	[1st edition]
Descrizione fisica	1 online resource (685 p.)
Collana	Woodhead Publishing series in electronic and optical materials, , 2050-1501 ; ; no. 41
Altri autori (Persone)	KatayamaS (Seiji)
Disciplina	671.52
Soggetti	Laser welding Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	part I. Developments in established laser welding technologies -- part II. Laser welding technologies for various materials -- part III. Developments in emerging laser welding technologies -- part IV. Applications of laser welding.
Sommario/riassunto	Laser welding is a rapidly developing and versatile technology which has found increasing applications in industry and manufacturing. It allows the precision welding of small and hard-to-reach areas, and is particularly suitable for operation under computer or robotic control. The Handbook of laser welding technologies reviews the latest developments in the field and how they can be used across a variety of applications. Part one provides an introduction to the fundamentals of laser welding before moving on to explore developments in established technologies including CO <sub>2</sub> laser welding,
