

1. Record Nr.	UNINA9910463410303321
Autore	Dinerstein Eric <1952->
Titolo	The return of the unicorns : the natural history and conservation of the greater one-horned rhinoceros / / Eric Dinerstein ; designed by Chang Jae Lee
Pubbl/distr/stampa	New York, [New York] : , : Columbia University Press, , 2003 ©2003
ISBN	0-231-50130-7
Descrizione fisica	1 online resource (384 p.)
Collana	Biology and Resource Management Series
Disciplina	639.97/9668
Soggetti	Indian rhinoceros Endangered species - Asia Wildlife conservation - Nepal - Royal Chitwan National Park Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Frontmatter -- Contents -- Foreword -- Preface -- Introduction -- Part I. Vanishing Mammals, Vanishing Landscapes -- Introduction -- Chapter 1. Vanishing Mammals: The Rise and Fall of the Rhinoceros -- Chapter 2. Culture, Conservation, and the Demand for Rhinoceros Horn -- Chapter 3. Vanishing Landscapes: The Floodplain Ecosystem of the Terai -- Part II. The Biology of an Endangered Megaherbivore -- Chapter 4. Size and Sexual Dimorphism in Greater One-Horned Rhinoceros -- Chapter 5. The Biology of an Extinction-Prone Species: Facing Demographic, Genetic, and Environmental Threats -- Chapter 6. Life on the Floodplain: Spacing and Ranging Behavior, Feeding Ecology, and Activity Patterns -- Chapter 7. Male Dominance, Reproductive Success, and the "Incisor-Size Hypothesis" -- Chapter 8. Endangered Phenomena: Rhinoceros as Landscape Architects -- Part III. The Recovery of Endangered Large Mammal Populations and their Habitats in Asia -- Introduction -- Chapter 9. Does Privately Owned Ecotourism Support Conservation of Charismatic Large Mammals? -- Chapter 10. Making Room for Megafauna: Promoting Local Guardianship of Endangered Species and Landscape-Scale Conservation -- Chapter 11.

The Recovery of Rhinoceros and Other Large Asian Mammals --
Appendix A. Methods -- Appendix B. Measurements and Other Physical
Features of Greater One-Horned Rhinoceros Captured in Royal Chitwan
National Park -- Appendix C. Demographic and Genetic Data --
Appendix D. Seasonal Home Range and Daily Movements -- Appendix
E. A Profile of Rhinoceros Behavior -- Appendix F. Reproductive
Histories of Adult Female Rhinoceros -- References -- Index

Sommario/riassunto

Beginning in 1984, Eric Dinerstein led a team directly responsible for the recovery of the greater one-horned rhinoceros in the Royal Chitwan National Park in Nepal, where the population had once declined to as few as 100 rhinos. *The Return of the Unicorns* is an account of what it takes to save endangered large mammals. In its pages, Dinerstein outlines the multifaceted recovery program-structured around targeted fieldwork and scientific research, effective protective measures, habitat planning and management, public-awareness campaigns, economic incentives to promote local guardianship, and bold, uncompromising leadership-that brought these extraordinary animals back from the brink of extinction. In an age when scientists must also become politicians, educators, fund-raisers, and activists to safeguard the subjects that they study, Dinerstein's inspiring story offers a successful model for large-mammal conservation that can be applied throughout Asia and across the globe.
