Sommario/riassunto This book covers both historical and contemporary concerns, including the role fashion plays in subcultures. Fashion is a phenomenon that exemplifies diversity across cultures. It is dependent on time and place and commonly defined as the prevailing style at a given moment or place. Fashion is codified and endowed with social meanings about gender, sexuality and identity. Dress frames the body. It expresses who we are and who we are not as a means of expressing identity and a way of interacting and belonging to a particular culture. Dress also plays an important part in proclaiming a person's self

Sommario/riassunto

This unique volume imparts practical information on the operation, maintenance, and modernization of heavy performance machines such as lignite mine machines, bucket wheel excavators, and spreaders. Problems of large scale machines (mega machines) are highly specific and not well recognized in the common mechanical engineering environment. Prof. Rusiski and his co-authors identify solutions that increase the durability of these machines as well as discuss methods of failure analysis and technical condition assessment procedures. "Surface Mining Machines: Problems in Maintenance and Modernization" stands as a much-needed guidebook for engineers facing the particular challenges of heavy performance machines and offers a distinct and interesting demonstration of scale-up issues for researchers and scientists from across the fields of machine design and mechanical engineering.
