

1. Record Nr.	UNINA9910463483103321
Titolo	Computational network theory : theoretical foundations and applications // Edited by Matthias Dehmer, Frank Emmert-Streib, and Stefan Pickl
Pubbl/distr/stampa	Weinheim, Germany : , : Wiley-VCH Verlag GmbH & Co. KGaA, , 2015 ©2015
ISBN	3-527-69154-5 3-527-69151-0
Descrizione fisica	1 online resource (281 p.)
Collana	Quantitative and network biology ; ; Volume 5
Disciplina	006.3
Soggetti	Electronic commerce Computational intelligence Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Cover; Title Page; Copyright; Dedication; Contents; Color Plates; Preface; List of Contributors; Chapter 1 Model Selection for Neural Network Models: A Statistical Perspective; 1.1 Introduction; 1.2 Feedforward Neural Network Models; 1.3 Model Selection; 1.3.1 Feature Selection by Relevance Measures; 1.3.2 Some Numerical Examples; 1.3.3 Application to Real Data; 1.4 The Selection of the Hidden Layer Size; 1.4.1 A Reality Check Approach; 1.4.2 Numerical Examples by Using the Reality Check; 1.4.3 Testing Superior Predictive Ability for Neural Network Modeling 1.4.4 Some Numerical Results Using Test of Superior Predictive Ability1. 4.5 An Application to Real Data; 1.5 Concluding Remarks; References; Chapter 2 Measuring Structural Correlations in Graphs; 2.1 Introduction; 2.1.1 Solutions for Measuring Structural Correlations; 2.2 Related Work; 2.3 Self Structural Correlation; 2.3.1 Problem Formulation; 2.3.2 The Measure; 2.3.2.1 Random Walk and Hitting Time; 2.3.2.2 Decayed Hitting Time; 2.3.3 Computing Decayed Hitting Time; 2.3.3.1 Iterative Approximation; 2.3.3.2 A Sampling Algorithm for $h(v_i, B)$; 2.3.3.3 Complexity; 2.3.4 Assessing SSC

2.3.4.1 Estimating (Vq) 2.3.4.2 Estimating the Significance of (Vq) ;
2.3.5 Empirical Studies; 2.3.5.1 Datasets; 2.3.5.2 Performance of DHT
Approximation; 2.3.5.3 Effectiveness on Synthetic Events; 2.3.5.4 SSC
of Real Event; 2.3.5.5 Scalability of Sampling-*alg*; 2.3.6 Discussions;
2.4 Two-Event Structural Correlation; 2.4.1 Preliminaries and Problem
Formulation; 2.4.2 Measuring TESC; 2.4.2.1 The Test; 2.4.2.2 Reference
Nodes; 2.4.3 Reference Node Sampling; 2.4.3.1 Batch_BFS; 2.4.3.2
Importance Sampling; 2.4.3.3 Global Sampling in Whole Graph; 2.4.3.4
Complexity Analysis; 2.4.4 Experiments
2.4.4.1 Graph Datasets2.4.4.2 Event Simulation Methodology; 2.4.4.3
Performance Comparison; 2.4.4.4 Batch Importance Sampling; 2.4.4.5
Impact of Graph Density; 2.4.4.6 Efficiency and Scalability; 2.4.4.7 Real
Events; 2.4.5 Discussions; 2.5 Conclusions; Acknowledgments;
References; Chapter 3 Spectral Graph Theory and Structural Analysis of
Complex Networks: An Introduction; 3.1 Introduction; 3.2 Graph
Theory: Some Basic Concepts; 3.2.1 Connectivity in Graphs; 3.2.2
Subgraphs and Special Graphs; 3.3 Matrix Theory: Some Basic
Concepts; 3.3.1 Trace and Determinant of a Matrix
3.3.2 Eigenvalues and Eigenvectors of a Matrix3.4 Graph Matrices;
3.4.1 Adjacency Matrix; 3.4.2 Incidence Matrix; 3.4.3 Degree Matrix
and Diffusion Matrix; 3.4.4 Laplace Matrix; 3.4.5 Cut-Set Matrix; 3.4.6
Path Matrix; 3.5 Spectral Graph Theory: Some Basic Results; 3.5.1
Spectral Characterization of Graph Connectivity; 3.5.1.1 Spectral Theory
and Walks; 3.5.2 Spectral Characteristics of some Special Graphs and
Subgraphs; 3.5.2.1 Tree; 3.5.2.2 Bipartite Graph; 3.5.2.3 Complete
Graph; 3.5.2.4 Regular Graph; 3.5.2.5 Line Graph; 3.5.3 Spectral Theory
and Graph Colouring
3.5.4 Spectral Theory and Graph Drawing

Sommario/riassunto

This comprehensive introduction to computational network theory as a branch of network theory builds on the understanding that such networks are a tool to derive or verify hypotheses by applying computational techniques to large scale network data. The highly experienced team of editors and high-profile authors from around the world present and explain a number of methods that are representative of computational network theory, derived from graph theory, as well as computational and statistical techniques. With its coherent structure and homogenous style, this reference is equally suitable for
