Lax Ethical Standards Promote Pseudoscience

Sommario/riassunto

""Science is a way of thinking about and investigating the accuracy of assumptions about the world. It is a process for solving problems in which we learn from our mistakes. Social work has a long history of social reform and helping others - let's continue this by paying attention to the important message of this book."".. Eileen Gambrill, School of Social Welfare, University of California at Berkeley (from the Foreword). While many psychosocial interventions used in social work practice have strong research evidence supporting their efficacy, a surprising number do not, potentially resulting
