## Sommario/riassunto

The contributors of *Policy, Planning, and People* argue for the promotion of social equity and quality of life by designing and evaluating urban policies and plans. Edited by Naomi Carmon and Susan S. Fainstein, the volume features original essays by leading authorities in the field of urban planning and policy, mainly from the United States, but also from Canada, Hungary, Italy, and Israel. The contributors discuss goal setting and ethics in planning, illuminate paradigm shifts, make policy recommendations, and arrive at best practices for future planning. *Policy, Planning, and People* includes theoretical as well as practice-based essays on a wide range of planning issues: housing and neighborhood, transportation, surveillance and safety, the network society, regional development and community development. Several essays are devoted to disadvantaged and excluded groups such as senior citizens, the poor, and migrant workers. The unifying themes of this volume are the values of equity, diversity, and democratic participation. The contributors discuss and draw conclusions related to the planning process and its outcomes. They demonstrate the need to look beyond efficiency to determine who benefits from urban policies and plans. Contributors: Alberta Andreotti, Tridib Banerjee, Rachel G.
