Regional Countries Private Consumption Growth Regression; VI. Conclusion; 4. Regional Countries private Investment Growth Regressions; Appendix; Data Sources and Description; References
Sommario/riassunto	This paper tests the association between the Gulf Cooperation Council (GCC) countries' financial and remittance outflows and regional growth in the Middle East. The findings, based on 35-year panel data, indicate that growth rates of real GDP, private consumption and private investment in regional countries are strongly associated with

remittance outflows from and the accumulation of financial surpluses in the GCC. Unlike in other developing and emerging market countries, growth in regional countries is not influenced by growth in the North, and is not export led. Linkages with the GCC could h
