

1. Record Nr.	UNINA9910463600903321
Autore	Choi Woon Gyu
Titolo	New Keynesian exchange rate pass-through / / Woon Gyu Choi and David Cook ; authorized for distribution by Nadeem Haque
Pubbl/distr/stampa	[Washington, District of Columbia] : , : International Monetary Fund, , 2008 ©2008
ISBN	1-4623-1442-2 1-4527-0972-6 9786612841644 1-4518-7071-X 1-282-84164-5
Descrizione fisica	1 online resource (27 p.)
Collana	IMF Working Papers IMF working paper ; ; WP/08/213
Altri autori (Persone)	CookDavid HaqueNadeem
Disciplina	332.450973
Soggetti	Foreign exchange rates - United States - Econometric models Phillips curve - Econometric models Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Contents; I. Introduction; II. The Model; III. The Data; Figures; 1. The Trade-Weighted Index of the Relative Prices; 2. U.S. Import Price Inflation and Foreign PPI Inflation; IV. Estimated Results; A. Defining Exchange Rate Pass-through; B. Benchmark Regressions; Tables; 1. Estimation Results of the Pass-Through Effect Model; C. Estimating Pass-Through Effects for a Sub-sample Period; D. Robustness Checks: Alternative Specification; 2. Estimating the Pass-through Effect Model: Alternative Specifications; E. Pass-through Effect Model with a Mix of LCP and PCP 3. Estimating the Pass-through Effect Model: A Mix of LCP and PCPF. Regional Models and Country Specific Exports; 4. Regional Pass-through Effect Model: A Mix of LCP and PCP; V. Conclusion; References; Appendix

Sommario/riassunto

Using the theory of optimal local currency pricing, this paper constructs a structural equation to estimate the rate at which foreign producer prices pass through the local currency prices of imported goods in the U.S. This can be viewed as measuring exchange rate pass-through, in line with price stickiness in the New Keynesian Phillips curve literature. We estimate the structural equation using the generalized methods of moments for consistent estimates of exchange rate pass-through. We find that a model with a mix of local currency pricing and producer currency pricing fits the data best. Th
