1. Record Nr. UNINA9910463621003321 Autore West Richard Titolo Quaternary research in Britain and Ireland: a history based on the activities of the subdepartment of Quaternary Research, University of Cambridge, 1948-1994 / / Richard West Pubbl/distr/stampa Leiden:,: Sidestone Press,, [2014] ©2014 **ISBN** 90-8890-258-5 Descrizione fisica 1 online resource (214 p.) Disciplina 551.7/9 Soggetti Paleobotany - Quaternary Geology, Stratigraphic - Quaternary Paleontology - Quaternary Paleoclimatology - Quaternary Archaeological geology - Great Britain - History Geology - Great Britain - History Geology - Ireland - History Archaeology - England - Fens, The Electronic books. Lingua di pubblicazione Inglese **Formato** Materiale a stampa Livello bibliografico Monografia Note generali Description based upon print version of record. Nota di bibliografia Includes bibliographical references. Nota di contenuto Preface: The contribution of Clement Reid (1853-1916) to the foundation of Quaternary research; From the early 1900's to 1929; Scandinavia and Britain: two regions, two histories; Developments in Scandinavia; Developments in Britain; Pollen analysis in Britain; The early 1930's; Progress on the Continent; The post-Congress period; Research Committees of the early 1930's; The Fenland Research

Committee; Progress in Cambridge; The beginnings; Fenland investigations; Extension of Fenland research; Basic principles; The expansion of research in Britain; Developments in research to the 1950's

The Devensian late-glacial Man's influence on vegetation history; Interglacials; Establishment of the Sub-department of Quaternary Research; A proposal in 1938; Re-iteration of the proposal in 1943; The General Board's proposal; References; The Subdepartment of Quaternary Research; Introduction; Organisation and people; Organisation; Laboratories; Academic staff; Assistant Staff; Post-Graduate students; Teaching, reference collections, databases, research; Teaching; Colloquia; Reference collections; Databases; Research

Research: vegetational history, including palaeoecology and palaeolimnology Vegetational history: Devensian late-glacial and Flandrian; Research: vegetational history of pre-Flandrian temperate stages and cold stages; Pre-Flandrian temperate stages; Cold stages; Research: geology; Coring and sediment recognition; Quaternary stratigraphy; Contributions to geology, glacial and fluviatile; Glacial limits; Regional studies; Periglacial phenomena; Changes of relative land/sea level: Overseas research; Research: faunas and archaeology; Faunas: Archaeology: Research: radiocarbon dating Publication of dates Laboratory history; Research activities; Research: mass spectrometry, palaeotemperatures and deep sea sediments; Establishment of the laboratory: Development : Subsequent research areas; Research; TL and ESR dating, palaeomagnetism, dendrochronology and dendroclimatology; Thermoluminescence; ESR dating; Palaeomagnetism; Dendrochronology, dendroclimatology; Dissolution, achievements, reflections; Dissolution; Achievements; Reflections; References; A wider view; Introduction; Aspects of the geology: Stratigraphy: the search for a system: Sediments and structures

Periglacial phenomena Palaeopedology; Geology and archaeology; Dating; Aspects of the biology; Developing interest; Palaeoecology and ecology; Pollen analysis; Treatment of data; Macroscopic plant remains; Faunas; Interpretations; Analogues; Processes; The Quaternary community; Quaternary associations, especially the Quaternary Research Association; Quaternary research centres; Research support; Journals; Envoi; References; Appendix A; Graduate students, Subdepartment of Quaternary Research; M.Phil. in Quaternary Research; Other graduate students noted in Annual Reports; Appendix B List of researchers

Sommario/riassunto

During the later part of the last century there was rapid development of the study and understanding of the changing environments of the last 2 million years. This came to provide a firm background for today's knowledge of the significance and importance of climatic change. Interdisciplinary research has been a prominent, if not essential, contributor to the successes achieved. In illustration of this connection, this volume describes here such developments in the University of Cambridge. In 1948 the University established a Subdepartment of Quaternary Research, with teaching and research
