

1. Record Nr.	UNINA9910463652103321
Titolo	Building design at Arup // editors, Christian Schittich, Christian Breusing
Pubbl/distr/stampa	Munich, [Germany] : , : Institut fur internationale Architektur-Dokumentation GmbH & Co. KG, , 2012 ©2012
ISBN	3-95553-010-8
Descrizione fisica	1 online resource (161 pages) : illustrations (some color), photographs
Collana	DETAIL Engineering ; ; 2
Classificazione	ZH 3450
Disciplina	720.922
Soggetti	Architecture, Modern - 20th century Architects - Great Britain Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Frontmatter -- Contents -- Arup today -- The power and the glory - strength and elegance in structure -- Total architecture - complexity and specialist expertise -- Paradise Regained - sustainable and environmental engineering -- Shaping the world - global reach and influence -- Pioneering passion - from personal inspiration to Arup culture -- Projects and people
Sommario/riassunto	The idea of designing, planning and building as an inseparable process The idea of "Total Architecture", as described by Ove Arup in his vision of design, continues to serve as the maxim for the globally operating engineering firm ARUP and its Building Engineering Department. Drawing on selected projects from recent years, this second volume in the new DETAIL engineering series shows how future-oriented and sustainable civil engineering can be combined with this ideal of a holistic design process - always with the aim of achieving perfect unity of strength and elegance in every structure. The focus is placed on the different processes that have accompanied the presented construction projects. Connections are shown between the individual buildings whose synergies are pursued in an exemplary fashion. The remarkable building projects reveal what continues to drive and inspire the engineers at ARUP to this day: a passion for pioneering work. ARUP

over the course of time Process descriptions from the perspective of the involved architects, engineers and planners From supporting structures to light design and building services to future-oriented civil engineering Interdisciplinary thinking, planning and realization "Total Architecture": comprehensive management of building projects, from the initial designs right through to construction
