Looming Capacity Constraints and Prospects for Additional Investments; 3. Natural Gas Sales Volume; B. Recent Institutional Changes and Possible Impact on Investment; III. Hydrocarbons Boom and Risk of Dutch Disease; A. Evolution of the real exchange rate; 4. Distribution of Gas Exports Receipts and Fiscal Balances; 5. Real and Nominal Exchange Rate; 6. Inflation and Relative Prices; IV. Policy Implications 7. External Sector Performance and Growth Appendix: Equilibrium Real Exchange Rate; References

Sommario/riassunto

The hydrocarbons sector has become one of the most dynamic economic activities in the Bolivian economy and the main driver of improved export performance and international reserve accumulation. The central role of the hydrocarbons sector in the economy is attributable to the high levels of investment made in the late 1990's, which permitted much higher production levels, particularly of natural gas. However those positive developments in the hydrocarbons sector have given rise to the possibility of a new case of "Dutch disease." While Bolivia's economy has already seen many benefits
