Sommario/riassunto	This is the first book to systematically review, update, organize, and critique the literature on the social psychology of disability in 30 years. The book gives pride of place to classic as well as contemporary concepts from the social psychology of disability and rehabilitation psychology that researchers and clinicians can use or adapt for their professional venues. The book's overarching message is an important one: The experience of most people with disabilities is not what nondisabled persons anticipate--contrary to the latter's beliefs and expectations, the former can lead full and no
