

1. Record Nr.	UNINA9910463724703321
Autore	Howard Sherrel G
Titolo	Drugs of abuse : pharmacology and molecular mechanisms // Sherrel G. Howard ; cover design by Matt Kuhns
Pubbl/distr/stampa	Ames, Iowa : , : Wiley-Blackwell, , 2014 ©2014
ISBN	1-118-85014-9 1-118-85015-7
Edizione	[Electronic version.]
Descrizione fisica	1 online resource (xiii, 194 pages) : illustrations
Altri autori (Persone)	KuhnsMatt
Disciplina	362.29
Soggetti	Central nervous system stimulants Drugs of abuse - Physiological effect Substance abuse - Treatment Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Biochemistry of neurotransmission -- Amphetamine and amphetamine analogues -- Cocaine -- Benzodiazepines and barbiturates -- Phencyclidine and ketamine -- Gamma hydroxybutyrate -- Morphine and morphine antagonists / Carlos Cepeda and Sherrel Howard -- LSD and mescaline -- Marijuana -- Inhalants and miscellaneous drugs -- Treatment and recovery programs / Mark DeAntonio.
Sommario/riassunto	Drug abuse has been, and continues to be, a global societal issue with diverse sets of impacts. Drugs of Abuse: Pharmacology and Molecular Mechanisms introduces the basic principles of pharmacology and neuroscience of drug abuse. Understanding the chemistry of commonly abused drugs and their impact on brain function will provide students and researchers with a more profound understanding of the molecular basis of drug abuse and addiction. Drugs of Abuse: Pharmacology and Molecular Mechanisms opens with a brief history of drug use and abuse. Subsequent sections look at specific families of drugs, including stimulants, depressants, and hallucinogens among others, and explore how their chemical make-up interacts with brain function. The final

chapter provides a brief overview of clinical substance abuse treatment.
