Sommario/riassunto	This second volume in the AOSpine Masters Series balances critical appraisal of current evidence in spine oncology with the opinions of

experienced spine surgeons to create a unique clinical reference for spine oncology surgeons. The book provides expert guidance to help clinicians make the right treatment decisions and provide the best care for their patients. The chapters have been written and researched by key leaders in spine oncology and range from general evaluation, staging, and decision making principles to histology-specific oncologic patient management. The AOSpine Masters Series, a
