We have a choice; Never mind who we are - what do we do?; It's what you don't have to think about that counts; The thinker and the sower Consider cultural influences when teaching patients activities of daily living The origin of adaptation; We need to talk the talk; Genesis of occupation: a philosophical model for therapy and theory; 3 The Magic of Healing; Engaging the mind to help the body overcome illness; Students are amazed to see the arts at work in the clinic; In times of bereavement; Don't overlook some handcrafts for your rheumatoid patients; How activity affects your patient's recovery process; A patient loves to do the teaching; A hard look at reality; Don't 'learn' occupational therapy from unfriendly systems 4 Old Crafts - New Ideas If you haven't got any steel, try using some papier mache; Chasing Belgian lace; If Martha has them doing crafts. . .; Paint can be all-purpose medium in the occupational therapy clinic; With knitting, you can be teacher or student; Buying craft supplies tells

something about the users; Quick! Find the knitting needles!; Crafts were the basis of the trades we still practice; An attempt to define purposeful activity; 5 Toys and Games; That perfect task may be in the cards; Cards are well-suited to therapy goals; It's all in the cards; How about getting all 'dolled' up?

The 'puzzle' behind the fun and fascination of activities 6 Saving the Environment; Hey, don't throw away all those six-pack rings yet!; No budget: what do we do now?; The case for recycling 'stuff'; Putting out the challenge to find what's cost effective; 7 Home, Garden and Beyond; Culture cooking makes for great occupational therapy; Fall: it's finally in the air; Water, water, everywhere, so have some fun; There's no end to what you can do with summer plants; Planting the seeds of accessible activity; There's lots of things to do 'lookin' out my back door'

Considering public education and the kitchen cabinet Bread: it can be the staff of your staff's life in the clinic; The key to self-worth may be right at your fingertips; If you play with your food, do it right; Yes, Virginia, there is activity-based occupational therapy; The therapy that's in your office; Water sport in retirement; Did you ever want to be a '90s Johnny Appleseed?; 8 Pets and People; Try some activities with man's best friend; Are pets the therapy tool your practice is missing?; 9 Occupational Technology and Occupational Therapy
Occupational technology, past, present and future

Sommario/riassunto

At last, a book about the little pieces of occupation which make up life's real situations and experiences and form a basis for therapy. Offered in the form of stories about practice previously published in the popular US publication *Advance for Occupational Therapy Practitioners*, this enjoyable book presents occupational therapists as "masters of the mundane." Therapists, students and educators will find this easy to read text a useful tool in guiding clinical approaches to therapy. Accompanied by theoretical papers by Dr. Estelle Breines and colleagues previously published in
