Sommario/riassunto	Investigative and Forensic Interviewing: A Personality-Focused Approach looks at the personality styles most commonly encountered in the criminal justice system and demonstrates how to use this insight to plan and conduct a productive interview. The book includes chapters on narcissistic, antisocial, psychopathic, borderline, inadequate/immature, paranoid, and schizotypal personalities. Written by forensic psychologists and former FBI investigators, each chapter begins with a vignette that displays the personality of an interviewee investigators might encounter in a forensic setting and then covers.
